PROFILE

I build full-stack web applications using MERN stack, REST APIs, and responsive design, with projects like AllInOneClick (shopping platform) and Clean City 2D Game. With 5+ years in project management, I've led European-wide software rollouts, optimizing processes and ensuring seamless adoption. I excel in agile development, stakeholder collaboration, system transitions, multilingual training, and end-to-end implementation, driving efficiency and innovation.

WORK EXPERIENCE

DIM Brands International   2022 – Present

Europe Travel & Entertainment Manager

- I have successfully led European-wide software rollouts, ensuring process optimization and seamless adoption
- I managed large-scale digital transformations, including the deployment of new expense management systems, corporate card programs, and travel solutions for European entities
- I oversaw the vendor selection, contract negotiations, and phased rollouts and I ensured smooth transitions while minimizing operational risks.
- I have collaborated closely with CFOs, HR teams, and legal departments, addressing compliance requirements and employee experience challenges.

Hanesbrands Inc.   2016- 2022

EMEA Senior Analyst Credit Card Services

- I coordinated country deployment of new T&E system and new corporate cards in Europe
- I coordinated the country rollouts, planning, resourcing, management of risks & issues, escalations, and local reporting
- I provided project management expertise working with key decision makers, and internal team members to manage continuous process improvements and provide technical expertise
- I audited the expense reports

EDUCATION

Web Development Bootcamp

Ironhack   **2024 – 2025**

- Built a strong foundation into HTML and CSS, to create web pages with style and structure
- Got hands-on experience eit Git for version control and collaboration, through pair programming on projects
- Learnt responsive web design and Flexbox
- Dived into ReactJS, embraced single-page applications and component-based development, as well as APIs integrations
- On the back-end development side, I learnt to create a server using NodeJS and ExpressJS, as well as how to use MongoDB, a non-relational database
- I learnt how to integrate React with the Back-end to create full-stack applications
- I introduced authentication in my applications, error handling programming

Front-end courses

SheCodes   **2022- 2023**

- SheCodes Basic course: Foundations of HTML and CSS and how to build interaction with JavaScript
- SheCodes Plus course: I learnt how to build websites with live data using APIs, advanced JavaScript
- SheCodes Responsive: I learnt how to code responsive websites that adapt to any device
- SheCodes React course: I learnt how to build highly-interactive apps using the React.JS framework
